

WARRENS OFFICE

Environmental Policy

Warrens Office is committed to action to prevent climate change and to preserve the environment. We are very proud of our ISO14001 and Carbon Smart accreditations.

We recognise that positive action is important to the local community. We have signed up to the Winchester Declaration of Climate Change and we are a member of the Winchester Action on Climate Change group. We also provide green services to our customers.

Our target for 2015 is to reduce our carbon footprint by 16%.

We will achieve this target by taking positive action, including:

- ✓ Introducing route optimisation and driver behaviour systems on our vans and gradually replacing our fleet with greener vehicles. We have just added a new zero-emissions Vito E-CELL van to our fleet to serve our local customers.
- ✓ Cycle to work scheme and indoor cycle storage and showers for our staff.
- ✓ Switch off scheme and gradual replacement with LED lighting.
- ✓ Avoiding printing through email and projectors, as well as using both sides of paper we do need to use.
- ✓ Extensive recycling and using a waste for energy scheme.

Our environmental impact is under constant review as we strive to reduce our carbon footprint and to minimise the effect of our business on the environment. This Policy will also be reviewed annually. Decisions are taken at Board level and there is a management-down approach. All our staff are on board and support us. After all, it makes good business sense!
